# Why **SPLENDOR**

*259 SunStar: Black Extended Hull Stripe with Red Accent*

For over 30 years, Splendor has grown and prospered. Innovation, quality improvements, and a personable, family-centered business environment and attitude have propelled Splendor Boats to the top of our industry. Our proprietary products have achieved the highest of marks on industry tests, received rave reviews from the experts, and enjoyed exceptional customer satisfaction over the years.

#### THE DRIVING FORCE

Splendor's unique catamaran hull is the driving force behind what makes our boats so special. The hull design compacts air and water as they travel through the inside of the hull's tunnel, virtually eliminating the pounding that other boats experience in rough waters. Thanks to years of improving our design, turns are tight and smooth with very little power loss.

# 220 *Katana* OB | OB DBD

## Features:

- Hand-Laid Fiberglass Construction
- Wood-Free Construction
- Basic Hull Stripe
- True Wrap-Around Windshield with Center Hatch
- Raised Cockpit
- Fusion Premium Bluetooth AM/FM Stereo
- (4) Fusion Premium 6.5" Speakers
- 9" Digital Dash Display
- Under Seat Storage Compartments
- Pull Back Bow Seats Storage
- Electronic Engine Hatch (OB DBD Only)
- Dual Batteries with Manual Switch
- Multiple USB Charging Ports
- Dual Power-Rise Captain's Chairs
- Rear Lounge Style Seat
- Spotter Seat with Built-in Cooler
- LED Courtesy Lights
- LED Docking Lights
- Stainless Steel Pull-Up Cleats & Mid-Ship Cleats
- Portside Glove Box
- Tilt Steering
- Horn
- Manual/Auto Bilge Pumps
- Bilge Blower System
- Self-Bailing Deck
- Stainless Steel Forward and Aft Boarding Ladders
- Stainless Steel Hardware
- Over Motor Ski Tote
- Saltwater Ready Engine
- Sunbrella® Bimini Top
- Sunbrella® Bow Cover
- Sunbrella® Cockpit & Windshield Cover
- DBD Sport Pod (2' Motor Pod w/ Water-level Swim Platform)
- DBD Sport Pod Flush Built-in Ladder

# 220 Katana OB | OB DBD

The 220 Katana OB mirrors its I/O counterpart but with the prowess of an outboard motor. The Katana series offers two outboard motor configurations: Katana OB with a rear-mounted engine, and Katana OB DBD Sport Pod, with a 2-foot extended motor pod at water level. This model shares the exceptional qualities of our SunStar 239 & 259 Models, offering a slightly more compact yet equally impressive 2-foot reduction in length.

## Optional:

### Electronics:

Fusion Premium System Upgrade, VHF Simrad® Offshore Radio, RGB LED Interior Lighting and RGB LED Exterior Underwater Lighting, Blue LED Interior Lighting and Blue LED Exterior Underwater Lighting

### Upgrade Packages:

Cool Vibes Package, Island Package, AquaTraction™ Package and Premium Audio Package

### Trailer:

Galvanized Dual-Axle Trailer with Disc Surge Brakes, Swing Tongue Upgrade, Spare Tire with Mount, Painted Trailer Upgrade and Premium Appearance Package

### Canvas:

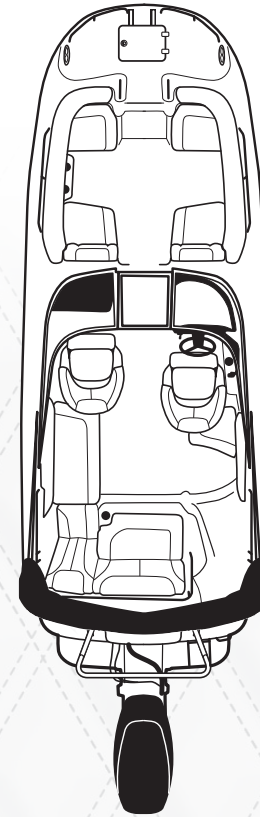

Sunbrella® Front Bimini, Sunbrella® Passage Flap, Rear Doggy Net, Motor Cover (OB Only)

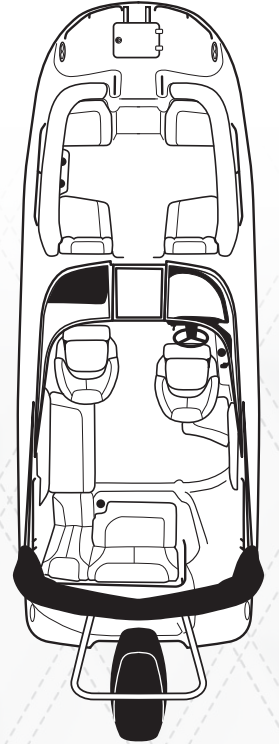

### General:

Deluxe Fiberglass Table, Snap-In Vinyl Flooring – Current Design, AquaTraction™ Flooring – Teak or Diamond Pattern, Coast Guard Kit, Rear Starboard Side Platform/Boarding Ladder (OB Only), Rear Transom Spray Down, 13 Gallon Freshwater Tank, Extended Hull Stripe, Small Graphics Kit and Large Graphics Kit

# 240 Platinum

The 240 Platinum is where it all began for Splendor Boats. This pioneer product of the boating world has consistently been one of the best performing boats of its size since its introduction in the early 1990s. While other catamaran boats typically require two motors to perform well, the Splendor catamaran hull designed for the 240 Platinum requires one motor, greatly reducing the cost associated with the ride of luxury a boat of this class provides.

## Optional:

# Construction

**The hull design compacts air and water as they travel through the inside of the hull's tunnel. This results in water and air pushing up on the hull at takeoff, forcing the boat up on plane very quickly with minimal bow rise. The constant flow of air through the tunnel is one of the attributes that allows Splendor boats to eliminate the pounding other boats experience in rough waters.**

## Performance

Why is our catamaran hull so special?

- Our proprietary catamaran hull design increases performance by allowing the boat to glide across choppy water. The unique design lets air and water move through the hull's tunnel in a dynamic function that lifts the boat, reduces the amount of hull in the water, and creates less drag while providing a very stable, smooth ride. Whether at the dock or running across open water, Splendor boats stay level and do not list side to side.
- The Splendor hull is a full-planing performance catamaran hull unlike all other catamarans on the market. Its design produces less drag through the water, providing better fuel efficiency. It also provides quick planing with a low bow rise during takeoff.
- The catamaran hull drafts in just 12 inches of water, providing a much shallower hull draft than traditional vee-bottom boats. This means you can navigate shallower water without bottoming out, making for easier channel maneuvering, safer cruising over sandbars, and getting to remote swimming holes.
- We designed our hull for a single engine source, outboard or sterndrive, giving the boat tight, smooth turns with very little power loss and ensuring good visibility from the helm. No other catamaran on the market performs as well as ours in smooth or rough water.

## Quality, Craftmanship and Durability

- Molds are the key factor in a smooth hull, and we build our own to ensure top quality. Our molds are stored indoors and waxed on a regular basis.
- Gel coats are applied first. The gel coat is sprayed on by hand, ensuring proper thickness and coverage throughout.
- The fiberglass sheets are hand laid and rolled smooth by experienced boat builders, giving our boats enduring strength.
- Premium, hand-sewn upholstery and top of the line Sunbrella® canvas are used on all Splendor Boats for seating and covers.
- A high grade of stainless steel rails and hardware are used throughout the boat.
- Our sprayed in, closed-cell polyurethane foam does not absorb water. The foam also adheres to the boat's stringers and hull, deadening sound and providing a solid feel at the helm.

100% Wood-Free.  
Premium Coosa  
Composites are  
used in all Splendor  
models.

## Safety

Ensuring the safety of our customers is paramount to us. Each Splendor Boat is meticulously certified to not only meet but surpass the rigorous quality and safety standards set by both the U.S. Coast Guard and the American Boating and Yachting Council. Every Splendor model undergoes a thorough certification process, guaranteeing the highest levels of quality and safety for our valued customers.

# SPLENDOR A Proud *Heritage*

*Doyle  
Heckaman*

## 3 GENERATIONS OF VALUE, TRADITION, & QUALITY CRAFTSMANSHIP

Splendor Boats has built the highest quality handcrafted catamaran deck boats for thirty years and now starts another chapter in our prestigious history. Our boats are now introduced to the nationwide dealer network. We are partnering with an experienced team of sales professionals to help write the newest chapter in the proud heritage and tradition that is Splendor Boats.

Our company's founder, Doyle Heckaman, started his fiberglass career in 1959. In 1972, he opened his own fiberglass company. Over the years, Doyle made just about everything possible out of fiberglass: steeples, fan housings, running boards, van tops, and, of course, boats. He took his ideas and concepts and designed, developed, and tooled hulls that he sold to major boat brands. He realized success. In 1989, he developed a new hull idea. He built the concept hull and after testing it, he proclaimed, "It was the smoothest and most stable ride I have ever experienced." It was there and then that he decided this one he would retain for his own, and the "Revolutionary Catamaran" hull was born; a new page in history was written. Along with his engineering team through vigorous efforts, Heckaman perfected the hull. The boat did not require two engines that similar boats demanded, and it performed magnificently. This single-engine design significantly lowered the cost associated with owning a luxury boat of this class. He and his team entered the height of splendor and Splendor Boats was officially born.

For over thirty years, Splendor has grown and prospered. Innovation, quality improvements, and a personable, family-centered business environment and attitude have propelled Splendor Boats to the top of our industry. Our proprietary products have achieved the highest of marks on industry tests, received rave reviews from the experts, and enjoyed exceptional customer satisfaction over the years.

In 2007, the family legacy continued with the third generation of Heckaman's taking the helm. Doyle's grandchildren Adam Heckaman, Andrew Heckaman and Amy (Heckaman) Parker still work side-by-side, each day, with their dedicated employees so that Splendor can continually provide better, more innovative products and services to our customers.

HIGH QUALITY, HANDCRAFTED CATAMARAN DECK BOATS
